

CYCLED AIR CONDITIONING

The Cycled Air Conditioning (AC) Program is your opportunity to save energy and money, while keeping your home cool and comfortable.

HOW IT WORKS

The Cycled AC Program cycles your central air conditioner on and off in 15-minute intervals during times of peak energy demand. But don't worry, your home stays cool and comfortable because your furnace fan continues to circulate cool air. It's easy, smart and will save you money.

IT'S FREE AND EASY

When you sign up, a radio receiver will be installed near the condensing unit of your air conditioner by a licensed electrician at no cost to you. The installation takes a few minutes and you don't even have to be home.

WE PAY YOU

Participating members receive a \$6 energy bill credit each year on their June, July and August electric bills. Plus, just for signing up you will receive a one-time \$35 credit on your electric bill.

IT'S THE RIGHT THING TO DO

Help us manage the rising cost of wholesale power and reduce the need to build additional generation plants. Working to reduce our peak demand saves us from purchasing power off the market that is very expensive during peak periods.
